

# Sashes

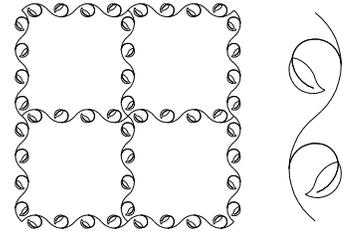

- all are illustrated with the 'freeze aspect' on
  - if they can be crossed, it is shown (see also 'Bars & bdrs for Bars' for non crossing patterns)
  - where they cross and/or turn, the design features will not stitch on top of each other
- they can all tolerate some compression or stretching – check your monitor before stitching out, choose another multiple if necessary
  - (x) shows the number of multiples in the set - if sold that way, the website shows each multiple within the set.
