

Gentry Mill - Quilting Plans

for Lynn Wilder's patchwork pattern

page 1 of 4

© Sharon Perry, updated October 2026 - for the personal use of the downloader only

www.houseofcreations.biz digitised quilting patterns & designs for:

Gammill, Statler Stitchers, Intelliquilters, Bernina, Compuquilters, Handiquilters and other computerised longarm machines

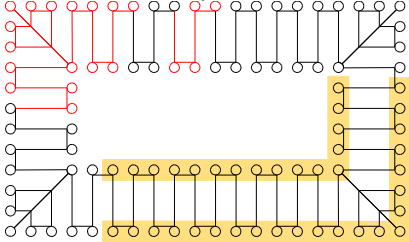

Border (outer)

This is very wide so what is shown is using triangles (matched to the block design used)
See the handout '[p2p Triangles in Borders](#)'

Corners

If not included as part of the border as above, then treat as a separate square.

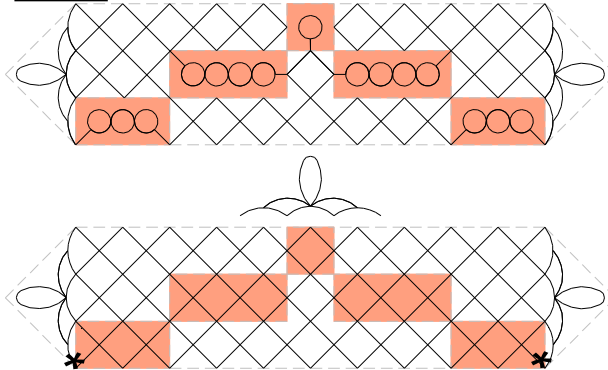

Inner Borders (3 treated as one)

Place as per usual – ensuring circles are in the outer piecing of this border.

Pole tops bdr & cnr (2)

Sashes

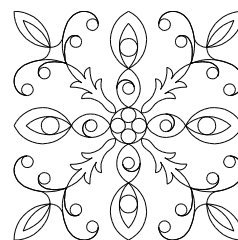

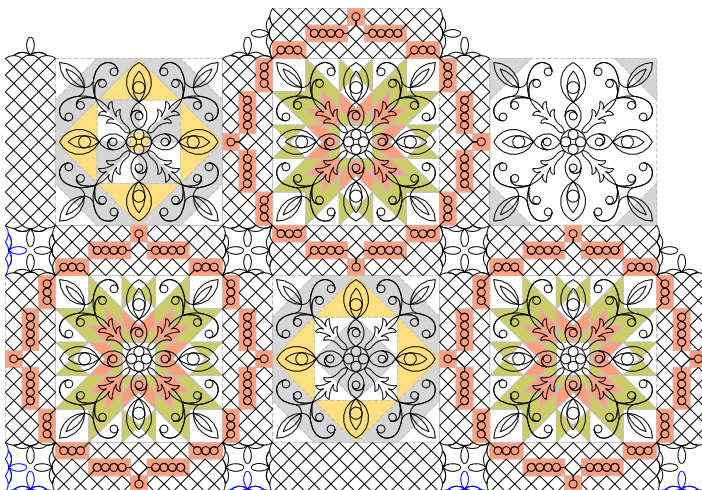

SEW ALL THESE FIRST

before any blocks, using them as basting and then roll the quilt back to do the blocks.

This enables any fabric manipulation to be done if required. The xhatching comes right out to the edges.

All versions used – use the one with no circles for the areas with no piecing (or use it in the pieced area as well??). It is a p2psu and can be registered continuously, but will not run continuously one sash to the next, whereas the one with circles is a true p2p.
